Obligation. The Fayette County Permits & Inspections Department (FCPID) has no obligation to explain every requirement, construction code, ordinance or law prior to or during the course of this project. Any and all construction codes, ordinances or laws are enforceable at any time, with or without prior notification.

Validity of permit. The issuance of a permit shall not be construed to be a permit for, or an approval of, any violation of any of the provisions of the construction codes or of any other ordinance. Permits presuming to give authority to violate or cancel the provisions of the construction codes or ordinances of the jurisdiction shall not be valid. The issuance of a permit based on construction documents and other data shall not prevent the FCPID from requiring the correction of errors in the construction documents and other data. The FCPID is also authorized to prevent occupancy or use of a structure where in violation of the construction codes or of any other ordinances of this jurisdiction.

Expiration. Every permit issued shall become invalid unless the work authorized by such permit is commenced within 180 days after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of 180 days after the time the work is commenced. A minimum of one inspection approval must be obtained as evidence that work was commenced or that work has continued. The determination as to whether work was suspended shall be based on the most recent inspection approval date.

Placement of permit. Work for which a permit is required shall not be commenced until the building permit or copy thereof is posted on the site of the work until the completion of the project. The posted permit shall be visible from the street and maintained in such location by the permittee until final approval has been granted by the FCPID.

Inspection record card and approved construction documents. Work for which a permit is required shall not be commenced until the permittee has made available an inspection record card and approved construction documents on the premises and in such a position to allow the FCPID convenient access and use. These items shall be protected from the elements and maintained in such location by the permittee until final approval has been granted by the FCPID.

Public duty, warranty and quality control. The permitting, plans examination or inspection conducted with regard to a building or structure in accordance with Chapter 5 of the Fayette County Code (this code) constitutes a public duty and does not warrant or ensure the absence of any hazard, deficiency or other matter. Any duty created by or based on this code is transferred to the public, and no private cause of action is created by a breach of such duty. This code shall not be construed to relieve from or lessen the responsibility of any person, firm or corporation owning, operating or controlling any building or structure from any damages to persons or property caused by defects, nor shall the FCPID be held as assuming any such liability by reason of the inspections or plans examinations authorized by this code or any permits or certificates issued under this code. The FCPID checks for substantial compliance with this code, but reviews and inspections performed by the FCPID pursuant to this Chapter do not create any guarantee or warranty that buildings, structures or service equipment have been constructed in accordance with all provisions of this code. The permitting, plans examination, or inspection of any building, structure, system, element, or construction document shall not be construed as a warranty of the physical condition or adequacy of such building, structure, system, element, or construction document, including without limitation a representation or warranty that a building or structure is complete, that it is in compliance with this code or any other law, that it was inspected, that it is safe or ready for occupancy or that it meets any particular degree of quality or workmanship. Quality control of materials and workmanship is not within the purview of this code except as it relates to the purposes stated therein. The amount and quality of inspection and other services provided is discretionary with the FCPID and may vary in response to the amount of staff, work load, training and experience, funding and other pertinent factors affecting whether and how inspection is made or whether any hazard, deficiency or similar matter is observed.

Amended construction documents. Work shall be installed in accordance with the approved construction documents, and any changes made during construction that are not in compliance with the approved construction documents shall be resubmitted for approval as an amended set of construction documents. Willful and prejudicial departure from or disregard of construction documents in any material respect without the approval of the FCPID is unlawful.

Inspections - general. Construction or work for which a permit is required shall be subject to inspection by the FCPID and such construction or work shall remain accessible and exposed for inspection purposes until approved. Approval as a result of an inspection shall not be construed to be an approval of a violation of the provisions of this code or of other ordinances of the jurisdiction. Inspections presuming to give authority to violate or cancel the provisions of this code or of other ordinances of the jurisdiction shall not be valid. It shall be the duty of the permit applicant to cause the work to remain accessible and exposed for inspection purposes. Neither the FCPID nor the jurisdiction shall be liable for expense entailed in the removal or replacement of any material required to allow inspection. Inspections will not be performed in (1) the presence of unrestrained animals, (2) in the presence of minors without a parent or legal guardian present, or (3) in an occupied structure without the contractor, owner or owner's agent present.

Inspection requests. It shall be the duty of the permit holder or their agent to notify the FCPID that such work is ready for inspection. It shall be the duty of the person requesting any inspections required by this code to provide access to and means for inspection of such work.

Inspection results. Inspection results (e.g. approved, disapproved, cancelled, discrepancy items, etc.) are not valid unless provided in writing.

Temporary power. The FCPID shall issue a temporary release on the electrical service conductors and service switch for a maximum period of 30 days. I assume all liability and responsibility for any use of electricity in the building during this period. I understand that an extension of this temporary approval must be applied for if work is not completed by the expiration date. The Building Official may refuse to extend this service and direct the utility company to disconnect service in the absence of an extension. I relieve Fayette County and its agents from liability for damage or loss for ordering the electrical service disconnected from the wiring system. I further understand that no occupancy of the subject building is to be allowed during this use of temporary service, and that any occupancy will result in immediate disconnection of electrical service.

Use and occupancy. No building or structure shall be used or occupied, and no change in the existing occupancy classification of a building or structure or portion thereof shall be made until the FCPID has issued a certificate of occupancy therefor as provided herein. Issuance of a certificate of occupancy shall not be construed as an approval of a violation of the provisions of this code or of other ordinances of the jurisdiction. Certificates presuming to give authority to violate or cancel the provisions of this code or other ordinances of the jurisdiction shall not be valid.

Revocation. The FCPID shall, in writing, suspend or revoke a certificate of occupancy issued under the provisions of this code wherever the certificate is issued in error, or on the basis of incorrect information supplied, or where it is determined that the building or structure or portion thereof is in violation of any ordinance or regulation or any of the provisions of this code.

Contractor licensing information. I certify that I have read the contractors information sheet (or declined to opportunity to do so) and I agree to comply with all county ordinances and state laws relating to building construction. I certify that I have a legal right to apply for this building permit, and I have received all approvals required.

(INITIAL) I certify that I have read this application (or declined the opportunity to do so) and state that the information provided is correct. I agree to comply with all county ordinances and state laws relating to building construction, and hereby authorize representatives of the FCPID to enter the above-mentioned property for inspection purposes. I certify that I have a legal right to apply for this building permit and to authorize entry. Additionally, I certify that this application is not in conflict with any deed restrictions of record; is in conformity with all conditions, covenants and restrictions; and I have received all approvals required.

(INITIAL) I have received (or declined receipt of) a copy of these requirements.

OWNER/BUILDER EXEMPTION:

(INITIAL) I am exempt from the Georgia State licensure requirements per O.C.G.A. 43-41-17(h) and have not applied for a permit under this exemption within the previous 24-month period.

CONTRACTOR LICENSING INFORMATION SHEET

O.C.G.A. 43-41, the following contractor types must obtain a license from the **Georgia State Board of Residential and General Contractors** by **July 1, 2008**:

- **Residential-Basic Contractor:** Those who perform contract work relative to detached one family and two-family residences and one-family townhouses not over three stories in height. Where the total value of the work or activity or of the compensation to be received by the contractor for such activity or work, whichever is the higher, exceeds \$2,500.00.
- **Residential-Light Commercial Contractor:** Those who perform contract work or activity related to multifamily and multiuse light commercial buildings and structures.
- **General Contractor:** Those who perform unlimited contractor services in commercial construction, including private, public, institutional and industrial contracting.
- **General Contractor Limited Tier:** Those who perform contractor services in commercial construction, including private, public, institutional and industrial contracting. These contractors have an established limit of \$500,000.00 per contract.

O.C.G.A. 43-41-2

"**Contractor**," except as specifically exempted by this chapter, means a person who is qualified, or required to be qualified, under this chapter and who, for compensation, contracts to, offers to undertake or undertakes to, submits a bid or a proposal to, or personally or by others performs the construction or the management of the construction for an owner of any building, bridge, or other structure, including a person who installs industrialized buildings as defined in paragraphs (3) and (4) of Code Section 8-2-111, for the construction or improvement of, addition to, or the repair, alteration, or remodeling of any such building, bridge, or structure for use by the owner or by others or for resale to others. The term "contractor" for purposes of this chapter shall include a person who contracts to, undertakes to, or submits a bid or proposal to perform, or otherwise does himself or herself perform, for an owner.

O.C.G.A. 43-41-9

- If an individual applicant proposes to engage in residential or general contracting in the individual's own name or a trade name where the individual is doing business as a sole proprietorship, the license shall be issued only to that individual. Where an applicant under this chapter is seeking issuance of a residential or general contractor license on behalf and for the benefit of a business organization seeking to engage in residential or general contracting as a business organization, the application for a license under this chapter must be submitted by and through an individual qualifying agent for such business organization or entity and expressly on behalf of such business organization or entity. In such case, the license shall be issued to the individual qualifying agent and to the affiliated business organization or entity on whose behalf the application was made. It shall be unlawful for any person, firm, corporation, or association to operate a business organization or entity engaged in the business of residential or general contracting without first obtaining a license from the appropriate division after the effective date of the licensing requirements as specified in subsection (a) of Code Section 43-41-17.
- If, during the period encompassed by a license issued to a qualifying agent acting for and on behalf of an affiliated business organization, there is a change in any information that is required to be stated on the application, the business organization shall, within **45 days** after such change occurs, furnish the correct information to the appropriate division.
- At least one qualifying agent shall be licensed under this chapter in order for the business organization to obtain a license as a residential or general contractor. If any qualifying agent ceases to be affiliated with such business organization, for any reason, he or she shall so inform the division having jurisdiction. In addition, if such qualifying agent is the only qualifying agent licensed hereunder affiliated with the business organization, the business organization shall promptly notify the appropriate division of the termination of the relationship with that qualifying agent and shall have **120 days** from the termination of the qualifying agent's affiliation with the business organization to employ another qualifying agent and submit an application for licensure under the new qualifying agent.

O.C.G.A. 43-41-14

- Any person, whether an individual or a business organization acting through a qualifying agent, intending to perform work as a residential or general contractor, upon making application to the building inspector or such other authority of any incorporated municipality or county in this state charged with the duty of issuing building or other permits for contemplated construction work requiring performance by either a licensed residential contractor or a licensed general contractor shall, before being entitled to the issuance of such permit, furnish to such inspector or authority, personally or through his or her authorized agent specifically designated to act on his or her behalf in a sworn written document submitted contemporaneously or previously submitted and maintained by such inspector or authority, his or her residential contractor or general contractor license number and the identity of any business organization for which such applicant is serving as qualifying agent that is undertaking or contracting as a residential contractor or a general contractor to construct or manage the construction.

O.C.G.A. 43-41-17

- Nothing in this chapter shall prevent any person holding a valid license issued by the State Construction Industry Licensing Board, or any division thereof, pursuant to Chapter 14 of this title from performing any work defined in the Code sections under which the license held by said person was issued. Furthermore, nothing in this chapter shall preclude a person licensed under Chapter 14 of this title to perform plumbing, conditioned air contracting, utility contracting, electrical contracting, or low-voltage contracting from offering to perform, performing, engaging in, or contracting to engage in the performance of construction work or services directly with an owner, which work would otherwise require a license under this chapter, where the total scope of the work to be performed is predominantly of the type for which such contractor is duly licensed to perform under Chapter 14 of this title such that any other work involved is incidental to and an integral part of the work performed within the scope of such license under said chapter and does not exceed the greater of \$10,000.00 or 25 percent of the total value at the time of contracting of the work to be performed; provided, however, that such contractor may not delegate or assign the responsibility to directly supervise and manage the performance of such other work to a person unless such person is licensed under this chapter and the work being performed by such person is within the scope of that person's license.
- Nothing in this chapter shall preclude a specialty contractor from offering or contracting to perform or undertaking or performing for an owner limited, specialty, or specific trade contractor work. However, nothing in this chapter shall permit a specialty contractor to perform work falling within the licensing requirements of Chapter 14 of this title where such specialty contractor is not duly licensed under such chapter to perform such work.
- Nothing in this chapter shall preclude any person from constructing a building or structure on real property owned by such person which is intended upon completion for use or occupancy solely by that person and his or her family, firm, or corporation and its employees, and not for use by the general public and not offered for sale or lease. In so doing, such person may act as his or her own contractor personally providing direct supervision and management of all work not performed by licensed contractors. However, if, under this subsection, the person or his or her family, firm, or corporation has previously sold or transferred a building or structure which had been constructed by such person acting without a licensed residential or general contractor within the **prior 24 month period**, starting from the date on which a certificate of occupancy was issued for such building or structure, then such person may not, under this subsection, construct another separate building or structure without having first obtained on his or her own behalf an appropriate residential or general contractor license or having engaged such a duly licensed contractor to perform such work to the extent required under this chapter, or it shall be presumed that the person, firm, or corporation did not intend such building solely for occupancy by that person and his or her family, firm, or corporation. Further, such person may not delegate the responsibility to directly supervise and manage all or any part of the work relating thereto to any other person unless that person is licensed under this chapter and the work being performed is within the scope of that person's license. In any event, however, all such work must be done in conformity with all other applicable provisions of this title, the rules and regulations of the board and division involved, and any applicable county or municipal resolutions, ordinances, codes, permitting, or inspection requirements.
